

## Copper Tube & Fittings for Medical Gas Pipeline

### Specifications:

BS 1172 (C106)/BS 6017 (Cu-DHP)

EN13348/EN1057-R250 (Originally  
BS2871 Table X)

BS 864 / 2

HTM 2022:1997/HTM 02-01 – Medical  
Gas Pipeline system

EN737-3: 1998 – Medical Gas Pipeline  
System

### Introduction

WTK is providing copper tube & fittings meeting the requirements of EN1057-R250 (Originally BS2871 Table X) & British Standard BS 864 / 2

### Description

All tubing is manufactured from phosphorus de-oxidized copper complying with BS 1172 (C106)/BS 6017 (Cu-DHP). All dimensions up to and including 67mm are to BS 864 / 2: 1983. Dimensions 76mm to 159mm are to accepted international specifications.

Munsen Rings, ID tapes, brazing rods etc. are the most common product for site installation and WTK is able to provide them to meet the quality and cost effectiveness.
